

### Lamaphon Compression Door Latch – 419 CP

A general purpose compression latch capable of applying substantial pressure to perimeter compressible gasket sealing.

The latch is commonly installed into high performance acoustic doors. The latch incorporates a through square steel shank enabling opening and closing from either side of the door. The outer handle is chrome plated and the inner handle is white enamel finished.

#### Applications

A suitable compressible perimeter seal for use with this latch is Siderise '16mm Half round door seal gasket' (as indicated in drawing) We would recommend that the door stop and threshold plate is rebated 2-4mm to accommodate this gasket.

#### Special Benefits

- ✓ Easy to install
- ✓ High performance
- ✓ Heavy duty
- ✓ Cost effective
- ✓ Robust
- ✓ Simple mechanism
